

August 10, 2026

Dear Valued Customer,

I am writing to share an important update. We are excited to announce that AP Tech is now a part of MFG Chemical, LLC, joining the platform of Radical Polymers and Masters Company to serve the water treatment market.

MFG Chemical, with headquarters in Chattanooga, is a leading specialty and custom chemical manufacturer for a variety of markets including Water Treatment, Paints and Coatings and Energy. This partnership strengthens our ability to serve you over the long term by investing in our people, capabilities, and operations. Just as importantly, it allows us to continue operating with the same values and customer focus you expect from us.

What does this mean for your business?

- **No disruption to orders, supply and support**
- **The same team, contacts, and leadership you work with today**
- **No change to our commitment of quality, safety, reliability, and innovative offerings**
- **Increased resources to offer, enhance and create new products for you and our industry**
- **Expansive offering of both solid and liquid formulated solutions**

If you have any questions or would like to discuss this further, please don't hesitate to reach out to me or your usual company contact. We value your partnership and look forward to continuing to grow together.

Thank you for your trust and business.

Sincerely,

A handwritten signature in black ink, appearing to read 'Katie Lee', with a stylized, cursive script.
