1 Identification

- · Product identifier
- · Trade name:
- Article number: 2573
- · Application of the substance / the mixture Water treatment
- · Uses advised against
- Processes involving extreme heat use advised against.

Any use carrying a risk of direct contact with eyes/skin where workers are exposed without adequate personal protective equipment (PPE).

Any use involving aerosol formation or vapour release in excess of the assigned WEL where workers are exposed without suitable Respiratory Protective Equpiment.

Processes involving the use of incompatible substances - refer to section 10.

The product is intended exclusively for industrial and professional use.

- \cdot Details of the supplier of the safety data sheet
- · Manufacturer/Supplier:
- Information department: Product safety department.
- · Emergency telephone number:

The American Association of Poison Control Centers (24-hour hotline): 1-800-222-1222

2 Hazard(s) identification

\cdot Classification of the substance or mixture

Skin Corrosion 1A H314 Causes severe skin burns and eye damage.

Eye Damage 1 H318 Causes serious eye damage.

Toxic to Reproduction 2 H361 Suspected of damaging fertility or the unborn child.

· Label elements

· Hazard pictograms

GHS05 GHS08

· Signal word Danger

- · Hazard-determining components of labeling:
- Sodium hydroxide
- Morpholine

· Hazard statements

H314 Causes severe skin burns and eye damage.

H361 Suspected of damaging fertility or the unborn child.

· Precautionary statements

- P260 Do not breathe dust.
- P270 Do not eat, drink or smoke when using this product.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

- P301+P330+P331 If swallowed: Rinse mouth. Do NOT induce vomiting.
- P302+P352 If on skin: Wash with plenty of water.
- P305+P351+P338 If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

- **vPvB:** Not applicable.

3 Composition/information on ingredients

· Chemical characterization: Mixtures

• Description: Mixture of the substances listed below with nonhazardous additions.

· Dangerous components:

71050-62-9	Phosphino-Carboxylic Acid (PCA)
------------	---------------------------------

- 1310-73-2 Sodium hydroxide
- 110-91-8 Morpholine

4 First-aid measures

- · Description of first aid measures
- · General information: Immediately remove any clothing soiled by the product.
- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact:
- Immediately rinse with water.
- If skin irritation continues, consult a doctor.
- · After eye contact:
- Check for and remove any contact lenses.
- Rinse opened eye for several minutes under running water. Then consult a doctor.
- · After swallowing:
- Rinse out mouth and then drink plenty of water.
- Do not induce vomiting; call for medical help immediately.
- If vomiting occurs spontaneously, keep head below hips to prevent aspiration.
- · Information for doctor: Inhalation of an aerosol of this substance may cause lung oedema.
- Most important symptoms and effects, both acute and delayed Corrosive damage to gastro-intestinal tract.
- Danger Danger of gastric perforation.
- **Indication of any immediate medical attention and special treatment needed** No further relevant information available.

5 Fire-fighting measures

- · Extinguishing media
- · Suitable extinguishing agents:

CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. Use fire fighting measures that suit the environment.

- \cdot For safety reasons unsuitable extinguishing agents: Water with full jet
- \cdot Special hazards arising from the substance or mixture
- Corrosive.

In case of fire, the following can be released:

7 Handling and storage

· Handling:

· Precautions for safe handling

Avoid direct contact (skin/eye contact, ingestion and/or inhalation of fume/mist/dust) with the product in the undiluted form.

Prevent formation of dust.

Ensure good ventilation/exhaustion at the workplace.

- Conditions for safe storage, including any incompatibilities • Storage:
- **Requirements to be met by storerooms and receptacles:** Prevent any seepage into the ground. Do not store in aluminium, copper, zinc containers.
- Information about storage in one common storage facility: Store away from oxidizing agents.
 Store away from foodstuffs.
 Do not store together with acids.
 Further information about storage conditions:
- Further information about storage conditions: Keep receptacle tightly sealed.
 Store in a bunded area.
 Storage class: 8 A
- Storage class: 8 A
- \cdot Specific end use(s) No further relevant information available.
- 8 Exposure controls/personal protection
- · Additional information about design of technical systems: No further data; see section 7.
- · Control parameters
- · Components with limit values that require monitoring at the workplace:
- The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit.
- At this time, the remaining constituent has no known exposure limits.

1310-73-2 Sodium hydroxide

- PEL Long-term value: 2 mg/m³
- REL Ceiling limit value: 2 mg/m³
- TLV Ceiling limit value: 2 mg/m³

110-91-8 Morpholine

- PEL Long-term value: 70 mg/m³, 20 ppm Skin
- REL Short-term value: 105 mg/m³, 30 ppm Long-term value: 70 mg/m³, 20 ppm Skin
- TLV Long-term value: 20 ppm Skin, A4

· Additional Occupational Exposure Limit Values for possible hazards during processing:

1310-73-2 Sodium hydroxide

- PEL Long-term value: 2 mg/m³
- REL Ceiling limit value: 2 mg/m³
- TLV Ceiling limit value: 2 mg/m³

• Additional information: The lists that were valid during the creation were used as basis.

- · Exposure controls
- · Personal protective equipment:
- Select PPE appropriate for the operations taking place taking into account the product properties.
- · General protective and hygienic measures:
- Do not eat, drink, smoke or sniff while working.
- Take note of assigned Workplace Exposure Limits.
- Keep away from foodstuffs, beverages and feed.
- Immediately remove all soiled and contaminated clothing.
- Wash hands before breaks and at the end of work.
- Avoid contact with the eyes and skin.
- Do not inhale gases / fumes / aerosols.
- Do not breathe dust

(Contd. of page 4)

· Breathing equipment:

Use suitable respiratory protective device in case of insufficient ventilation.

Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.

· Protection of hands:

Protective gloves.

Use gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU).

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation **Material of gloves**

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

• Eye protection:

Tightly sealed goggles conforming to EN166.

· Body protection:

Alkaline resistant protective clothing

Body protection must be chosen depending on product properties, activity and possible exposure.

10 Stability and reactivity

- · Reactivity No further relevant information available.
- · Chemical stability
- · Thermal decomposition / conditions to be avoided:

No decomposition if used and stored according to specifications. To avoid thermal decomposition do not overheat.

- Possibility of hazardous reactions
 The product is a strong base, it reacts violently with acid and is corrosive. Reacts violently with strong oxidants causing fire hazard.
 Reaction with nitrosating agents (e.g. nitrites, nitrous acid, nitrous gases) can release carcinogenic nitrosamines.
 Conditions to avoid No further relevant information available.
 Incompatible materials:
 Strong acids and oxidising agents
 Substances specifically listed in section 10.3 as incompatible.
- Hazardous decomposition products: Nitrogen oxides (NOx) Carbon monoxide and carbon dioxide Phosphorus oxides (e.g. P2O5) Sulfur oxides (SOx) Toxic metal oxide smoke

· Additional ecological information:

· General notes:

Must not reach bodies of water or drainage ditch undiluted or unneutralized.

Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

- · Results of PBT and vPvB assessment
- **PBT:** Not applicable.
- · **vPvB:** Not applicable.
- · Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

- · Recommendation:
- Recommended Hierarchy of Controls:
- Minimize waste;
- Reuse if not contaminated;
- Recycle, if possible; or
- Safe disposal (if all else fails).

Must not be disposed of together with household garbage. Do not allow product to reach sewage system. Contact waste processors for recycling information.

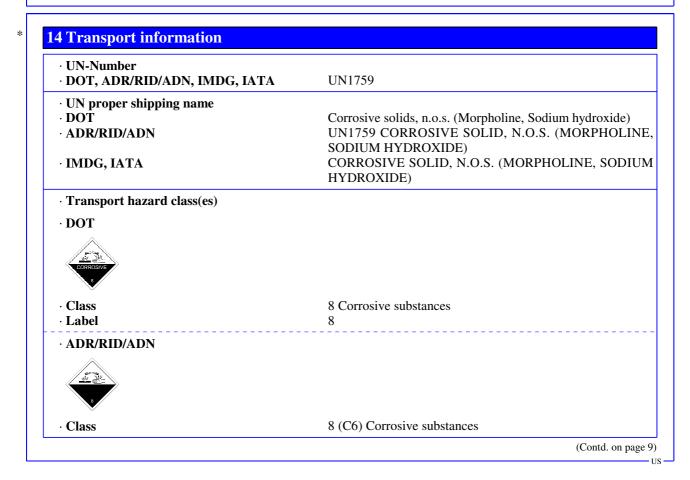

· Uncleaned packagings:

· Recommendation:

Empty contaminated packagings thoroughly. They can be recycled after thorough and proper cleaning. Container remains hazardous when empty. Continue to observe all precautions.

Containers, even those that are "empty," may contain residues that can develop flammable and/or hazardous vapours upon heating. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers.

• Recommended cleansing agent: Water, if necessary with cleansing agents.
