1 Identification

- · Product identifier
- · Trade name:
- · Article number: 4127
- · Application of the substance / the mixture Water treatment
- \cdot Uses advised against
- Processes involving extreme heat use advised against.

Any use involving aerosol formation or vapour release in excess of the assigned WEL where workers are exposed without suitable Respiratory Protective Equpiment.

Any use carrying a risk of direct contact with eyes/skin where workers are exposed without adequate personal protective equipment (PPE).

The product is intended exclusively for industrial and professional use.

- \cdot Details of the supplier of the safety data sheet
- · Manufacturer/Supplier:
- · Information department: Product safety department.
- · Emergency telephone number:

The American Association of Poison Control Centers (24-hour hotline): 1-800-222-1222

CHEMTREC: 800-424-9300 (Domestic North America) OR 703-527-3887 (International, collect calls accepted).

2 Hazard(s) identification

 \cdot Classification of the substance or mixture

Acute Toxicity - Oral 4 H302 Harmful if swallowed.

Skin Irritation 2 H315 Causes skin irritation.

Eye Irritation 2A H319 Causes serious eye irritation.

Toxic to Reproduction 2 H361 Suspected of damaging fertility or the unborn child.

· Label elements

· Hazard pictograms

· Signal word Warning

· Hazard-determining components of labeling:

Triazole derivative, neutralised* Tetrasodium (1-hydroxyethylidene)bisphosphonate Sodium 4(or 5)-methyl-1H-benzotriazolide

· Hazard statements

- H302 Harmful if swallowed.
- H315 Causes skin irritation.
- H319 Causes serious eye irritation.
- H361 Suspected of damaging fertility or the unborn child.
- · Precautionary statements
- P263 Avoid contact during pregnancy/while nursing.
- P270 Do not eat, drink or smoke when using this product.
- P280 Wear protective gloves/protective clothing/eye protection/face protection.
- P302+P352 If on skin: Wash with plenty of water.

P337+P313 present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
· Classification system:
· NFPA ratings (scale 0 - 4)
Health = 2 Fire = 1 Reactivity = 0
· HMIS-ratings (scale 0 - 4)
HEALTH2FIRE1REACTIVITY0
• Other hazards • Results of PBT and vPvB assessment • PBT: Not applicable. • vPvB: Not applicable.

• **vPvB:** Not applicable.

3 Composition/information on ingredients

· Chemical characterization: Mixtures

· Description: Mixture of the substances listed below with nonhazardous additions.

· Dangerous components:		
	Triazole derivative, neutralised*	10 – 25%
3794-83-0	Tetrasodium (1-hydroxyethylidene)bisphosphonate	10 - 25%
78620-07-2	Hydroxyphosphonoacetic acid, trisodium salt	2.5 - < 10%
7631-95-0	Sodium molybdate Alternative CAS number: 10102-40-6	2.5 - 10%
64665-57-2	Sodium 4(or 5)-methyl-1H-benzotriazolide	1%
· Additional information: *Equilibrium of Ionic pairs.		

4 First-aid measures

· Description of first aid measures

· General information:

Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact:

Immediately rinse with water.

If skin irritation continues, consult a doctor.

• After eye contact:

Check for and remove any contact lenses.

Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.

· After swallowing:

Rinse out mouth and then drink plenty of water.

Do not induce vomiting; call for medical help immediately.

If vomiting occurs spontaneously, keep head below hips to prevent aspiration.

• Information for doctor: Treat symptomatically and supportively.

· Most important symptoms and effects, both acute and delayed No further relevant information available.

5 Fire-fighting measures

- · Extinguishing media
- · Suitable extinguishing agents:
- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. Use fire fighting measures that suit the environment.
- · For safety reasons unsuitable extinguishing agents: Water with full jet
- · Special hazards arising from the substance or mixture In case of fire, the following can be released: Carbon monoxide (CO) Nitrogen oxides (NOx) Phosphorous oxides Sulphur Oxides (SOx) · Advice for firefighters
- · Protective equipment: Do not inhale explosion gases or combustion gases. Wear self-contained respiratory protective device. Wear fully protective suit.
- · Additional information Cool endangered receptacles with water spray. Collect contaminated fire fighting water separately. It must not enter the sewage system.

6 Accidental release measures			
· Personal precautions, protective equipment and emergency procedures			
Ensure adequate ventilation			
Wear protective equipment. Keep unprotected persons away.			
Avoid formation of dust.			
· Environmental precautions:			
Do not allow to penetrate the ground/soil.			
Do not allow to enter sewers/ surface or ground water.			
· Methods and material for containment and cleaning up:			
Pick up mechanically.			
Send for recovery or disposal in suitable receptacles.			
Ensure adequate ventilation.			
Reference to other sections			
See Section 7 for information on safe handling.			
See Section 8 for information on personal protection equipment.			
See Section 13 for disposal information.			
Protective Action Criteria for Chemicals			
· PAC-1:

7 Handling and storage

· Handling:

· Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace.

Prevent formation of dust.

Avoid direct contact (skin/eye contact, ingestion and/or inhalation of fume/mist/dust) with the product in the undiluted form.

Safety showers and eye wash facilities should be available at the work area.

- · Conditions for safe storage, including any incompatibilities
- · Storage:
- **Requirements to be met by storerooms and receptacles:** Prevent any seepage into the ground. Do not store in aluminium, copper, zinc containers.
- **Information about storage in one common storage facility:** Store away from oxidizing agents. Store away from foodstuffs.
- Further information about storage conditions: Store in cool, dry conditions in well sealed receptacles.
- Storage class: 11
- Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

• Additional information about design of technical systems: No further data; see section 7.

- · Control parameters
- · Components with limit values that require monitoring at the workplace:

The following constituent is the only constituent of the product which has a PEL, TLV or other recommended exposure limit.

At this time, the other constituents have no known exposure limits.

7631-95-0 Sodium molybdate

PEL Long-term value: 5 mg/m³ as Mo

TLV Long-term value: 0.5 mg/m³ as Mo; A3; respirable fraction

• Additional information: The lists that were valid during the creation were used as basis.

· Exposure controls

· Personal protective equipment:

- Select PPE appropriate for the operations taking place taking into account the product properties.
- · General protective and hygienic measures:

Do not eat, drink, smoke or sniff while working.

Take note of assigned Workplace Exposure Limits.

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing.

Wash hands before breaks and at the end of work.

Avoid contact with the eyes and skin.

Do not inhale dust / smoke / mist.

A safe system of work must be formulated and followed to ensure that workers who may be pregnant or breastfeeding do not come into direct contact with the product.

· Breathing equipment:

Use suitable respiratory protective device in case of insufficient ventilation.

Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.

Reviewed on 06/28/2024

(Contd. of page 4)

· Protection of hands:

Protective gloves.

Use gloves tested and approved under appropriate government standards such as NIOSH (US) or EN374 (EU).

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation \cdot Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

• Eye protection:

Tightly sealed goggles conforming to EN166.

· Body protection:

Impervious protective clothing

Body protection must be chosen depending on product properties, activity and possible exposure.

· Limitation and supervision of exposure into the environment

Do not allow to enter drains, sewers or watercourses.

- · Aspiration hazard Based on available data, the classification criteria are not met.

12 Ecological information

- · Toxicity
- · Aquatic toxicity: No further relevant information available.
- **Persistence and degradability** The organic portion of the product is biodegradable.
- · Behavior in environmental systems:
- · Bioaccumulative potential Contains components with the potential to bioaccumulate.
- · Mobility in soil No further relevant information available.
- · Ecotoxical effects:
- · Remark: Harmful to fish
- · Additional ecological information:
- · General notes:

Must not reach bodies of water or drainage ditch undiluted or unneutralized.

Harmful to aquatic organisms

Water hazard class 3 (Self-assessment): extremely hazardous for water

Do not allow product to reach ground water, water course or sewage system, even in small quantities.

Danger to drinking water if even extremely small quantities leak into the ground.

- · Results of PBT and vPvB assessment
- **PBT:** Not applicable.
- · **vPvB:** Not applicable.

· Other adverse effects No further relevant information available.

13 Disposal considerations

- · Waste treatment methods
- · Recommendation:
- Recommended Hierarchy of Controls:
- Minimize waste;
- Reuse if not contaminated;
- Recycle, if possible; or
- Safe disposal (if all else fails).

Must not be disposed of together with household garbage. Do not allow product to reach sewage system. Contact waste processors for recycling information.

· Uncleaned packagings:

· Recommendation:

Empty contaminated packagings thoroughly. They can be recycled after thorough and proper cleaning. Disposal must be made according to official regulations.

Containers, even those that are "empty," may contain residues that can develop hazardous gases and vapours upon heating. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers. · Recommended cleansing agent: Water, if necessary with cleansing agents.
