

THE FUTURE OF BIOLOGICAL DRAIN TREATMENT

What is bioTEQ

The bioTEQ block drain treatment program contains a unique, solid solution of bacteria and cleaning detergent which, when dispensed regularly into drain systems via the bioTEQ-DT Dispenser, will digest organic materials and reduce the complications caused by Fats, Oils & Greases (FOG).

Why Choose bioTEQ?

Application Benefits

- Foaming action contacts 360° of piping
- Formulated with surfactant to assist in cleaning pipes
- A 5 minute dose can supply treatment to approx. 50 feet of piping, up to 100x more than conventional liquid systems
- Program designed to supply 30-90 days of treatment
- System delivery of 0.7 gal/min of product solution

Handling Benefits

- 80% weight reduction compared to conventional liquids
- Sustainable greener solution - reduced packaging when compared to 5 gallon pails
- No risk of spills or splashing
- Improved operator safety – no hazardous chemicals
- Easier to handle, transport and manage inventory at end-use site

Bacteria Based Product

- Will not harm piping, environment or people
- Digests waste and converts it into carbon dioxide and water
- Consumes fats, oils and greases
- Keeps grease traps, pipes, drains and septic tanks clean and free flowing
- Reduces/eliminates foul odors
- Reduces drain fly habitat
- Reduces the frequency of costly pump out procedures
- Greatly minimizes the chance of expensive, emergency plumbing calls
