

SOLID DRAIN TREATMENT

Powerful. Efficient. Engineered to Perform.

Keep drains flowing, cut odors, and prevent costly emergency calls with **bioTEQ-DT-100** – a unique **solid, bacteria-based solution** engineered to outperform traditional liquid treatments in demanding commercial and industrial environments.

bioTEQ-DT-100 combines powerful *Bacillus* bacteria with a built-in cleaning agent. Paired with the **patent-pending enduroTEQ Nexa-DT Dispenser**, it delivers consistent, automated dosing that continuously breaks down organic buildup and fats, oils, and grease (FOG).

THE POWER OF BACILLUS-BASED SCIENCE + SOLID INNOVATION

Foam + Bacteria + Oxygen = Superior Results

360° FOAM COVERAGE

Expands to coat the entire inner pipe surface, reaching the “ceiling” and sides where buildup and larvae hide.

STRONG BACTERIA

Powerful *Bacillus* strains combined with surfactants for effective cleaning across varying conditions.

AERATION

Foaming introduces oxygen, accelerating bacterial growth and improving organic waste digestion..

SUPERIOR DOSING

A 5-minute automated dose produces high-volume foam that travels up to 50 feet—far beyond traditional liquid treatments.

ENGINEERED PERFORMANCE

360° Pipe Coverage:

Unique foaming action coats the full circumference of the pipe, not just the bottom.

Superior Dosing:

A single 5-minute dose treats up to 50 feet of piping - nearly 100x the reach of liquid systems.

Advanced Bacillus Science:

Formulated with resilient bacteria and surfactants that thrive in diverse pH levels and temperatures to actively break down FOG (Fats, Oils, and Grease).

HEALTH, HYGIENE & SAFETY

Eliminate Odors & Pests:

Destroys the organic “sludge” where drain flies breed and removes foul smells at the source.

Sustainable Chemistry:

100% safe for all piping materials, staff, and the environment. No hazardous splashing or harsh chemicals.

Ergonomic Handling:

Solid blocks are 80% lighter than liquid pails, reducing the risk of strain and minimizing packaging waste.

COST CONTROL & EFFICIENCY

Preventative Savings:

Minimizes expensive emergency plumbing calls and reduces the frequency of grease trap pump-outs.

Set-and-Forget Reliability:

Each block provides 30 to 90 days of automated, consistent treatment with minimal operator effort.

IDEAL APPLICATIONS

The bioTEQ system is specifically designed for high-demand environments:

- Commercial Kitchens & Restaurants
- Food Processing & Manufacturing
- Institutional Facilities (Hospitals/Schools/Corrections)
