

SOLID DRAIN TREATMENT

Powerful. Efficient. Engineered to Perform.

KEEP DRAINS FLOWING. ELIMINATE ODORS. PREVENT COSTLY EMERGENCIES.

bioTEQ-DT-100 is a **solid, bacteria-based drain treatment product** designed to outperform traditional liquid systems in demanding commercial and industrial environments.

Paired with the **patent-pending enduroTEQ™ Nexa-DT Dispenser**, it delivers automated, consistent dosing that continuously breaks down organic waste, including fats, oils, and grease (FOG).

WHY CHOOSE BIOTEQ?

360° Cleaning Power

- Advanced foaming action expands to coat the entire pipe - top, sides, and bottom - reaching areas liquid treatments miss.

Unmatched Reach

- A single 5-minute dose treats up to 50 feet of piping - nearly 100x more effective than standard liquid solutions.

Advanced Bacillus Technology

- Powerful, resilient bacteria combined with surfactants actively break down organic buildup across a wide range of pH levels and temperatures.

Continuous Performance

- Automated dosing ensures consistent, hands-free treatment for 30–90 days per block.

THE SCIENCE BEHIND BIOTEQ

Foam + Bacteria + Oxygen = Superior Results

360° FOAM COVERAGE

Expands to coat the entire inner pipe surface, reaching the “ceiling” and sides where buildup and larvae hide.

STRONG BACTERIA

Powerful *Bacillus* strains combined with surfactants for effective cleaning across varying conditions.

AERATION

Foaming introduces oxygen, accelerating bacterial growth and improving organic waste digestion..

SUPERIOR DOSING

A 5-minute automated dose produces high-volume foam that travels up to 50 feet—far beyond traditional liquid treatments.

SMART, RELIABLE, PROVEN

bioTEQ delivers consistent performance with less effort - so you can focus on running your operation, not fixing your drains.

Health, Hygiene & Safety

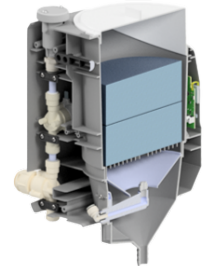

- **Eliminates Odors at the Source**
 - Removes the organic sludge that causes foul smells and attracts pests
- **Stops Drain Flies**
 - Breaks down breeding grounds where larvae thrive
- **Safe & Sustainable**
 - Non-hazardous formula—safe for pipes, staff, and the environment
- **Ergonomic Design**
 - Solid blocks are 80% lighter than liquid pails, reducing strain and waste

Nexa-DT
Dispenser*

Reduce Costs. Increase Efficiency.

- Prevent expensive emergency plumbing calls
- Reduce grease trap pump-out frequency
- Minimize labor with a **set-it-and-forget-it system** utilizing the patent pending [enduroTEQ Nexa-DT Dispenser](#)
- Improve overall drain system performance

IDEAL APPLICATIONS

The bioTEQ system is specifically designed for high-demand environments:

- Commercial Kitchens & Restaurants
- Food Processing & Manufacturing
- Institutional Facilities
(Hospitals/Schools/Corrections)
